CONFIDENTIAL STRATEGIC PROPOSAL

Amarillo, Texas Panhandle

Prepared For: **Chris Rhynehart, René Montoya & Dale Orr**

Local Market Dominance & High-Intent Search Growth Proposal

An evidence-based performance audit of **Rhynehart Roofing, Inc.** across Google Maps, local organic search, and generative AI engines — paired with an actionable 4-phase turnkey roadmap to capture untapped storm restoration and roof replacement demand across Amarillo.

CUSTOMER SENTIMENT	OVERALL LOCAL SCORE	CITY VISIBILITY SCORE	LOCAL AI VISIBILITY
4.9★ (96 Google Reviews)	45 / 100	16 / 100	6 / 100
René & Dale Highly Praised	BrightLocal Location Diagnostic	84-Point Visibility Gap	0% Google AI Overview

Target Website: rhynehart.com (Est. 1986 • Domain Active 2003) •

Address: 6900 W McCormick Rd, Amarillo, TX 79118

01

The Amarillo "1-Mile Barrier" & Visibility Gap

Why a stellar 4.9★ reputation isn't translating into city-wide inbound calls

The Geo-Grid Cliff in Numbers

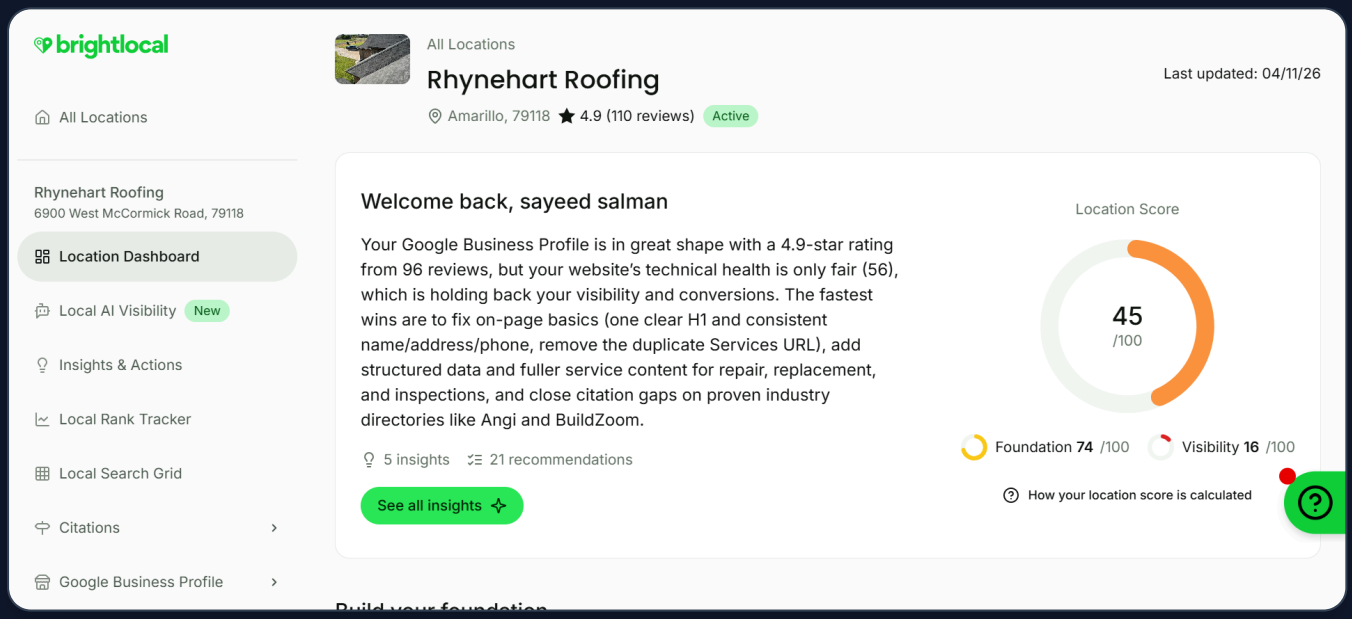

With a **nearly 40-year history since 1986** and a pristine **4.9★ rating**, Rhynehart possesses unmatched local trust. However, Google's map algorithms currently confine your visibility to a narrow perimeter around your physical shop.

Geo-Grid Breakdown (Roofing Contractor Amarillo TX):

- **Within 1 Mile (McCormick Rd / 79118):** Rank #1 to #3 (Green)
- **Central Amarillo (Downtown, Wolflin):** Rank #15 to #24 (Drop-off)
- **North & West Amarillo (Soncy, Medical Ctr):** Rank #26 to #50+ (Invisible)

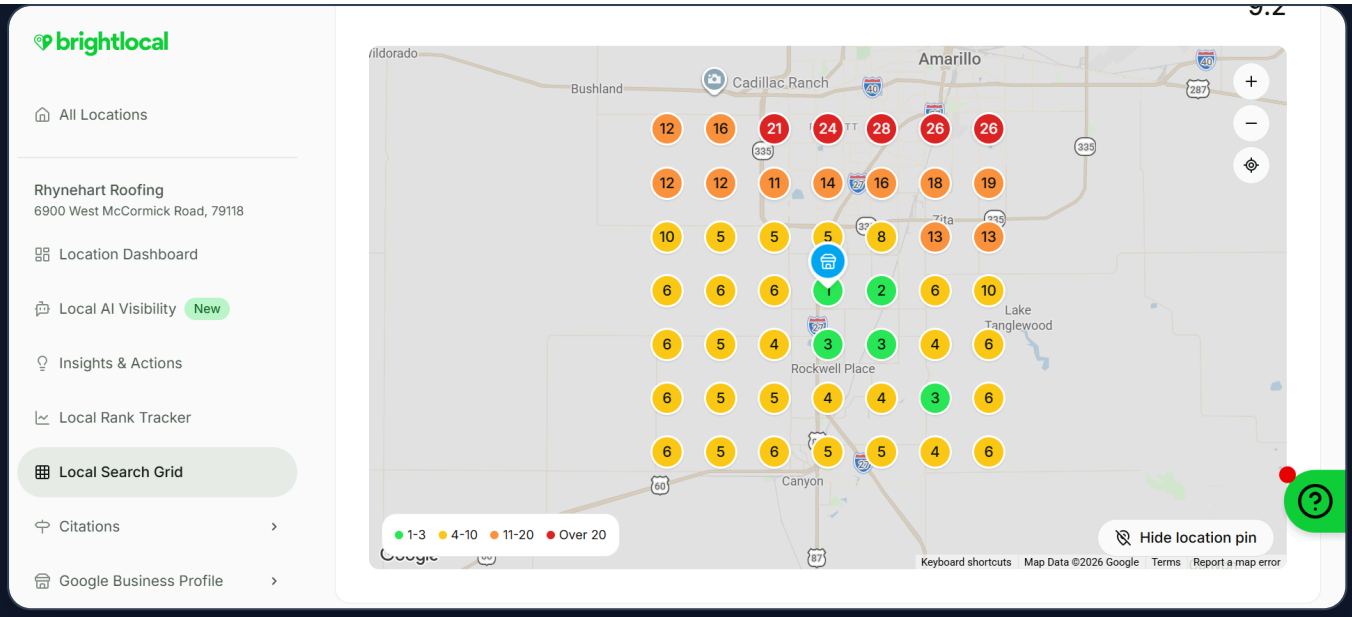

High-ticket storm replacements across higher-density areas are heavily captured by competitors who dominate the Map Pack: **TRX Roofing (Avg Rank 1.9)**, **Andrus Brothers (3.7)**, **Accent Roofing (5.0)**, and **Roof Smith (8.7)**.

OFFICIAL BRIGHTLOCAL AUDIT SCORE

Verified BrightLocal Location Audit ID #4191821

AUTHENTIC VISUAL EVIDENCE **Local Search Grid (LSG)** Query: "Roofing contractor Amarillo tx"

Average Rank	Top-3 Pack Share	Search Opportunity
9.2	Only 10%	High-Growth Gap

02 Website Technical Audit: 4 Key On-Page Issues

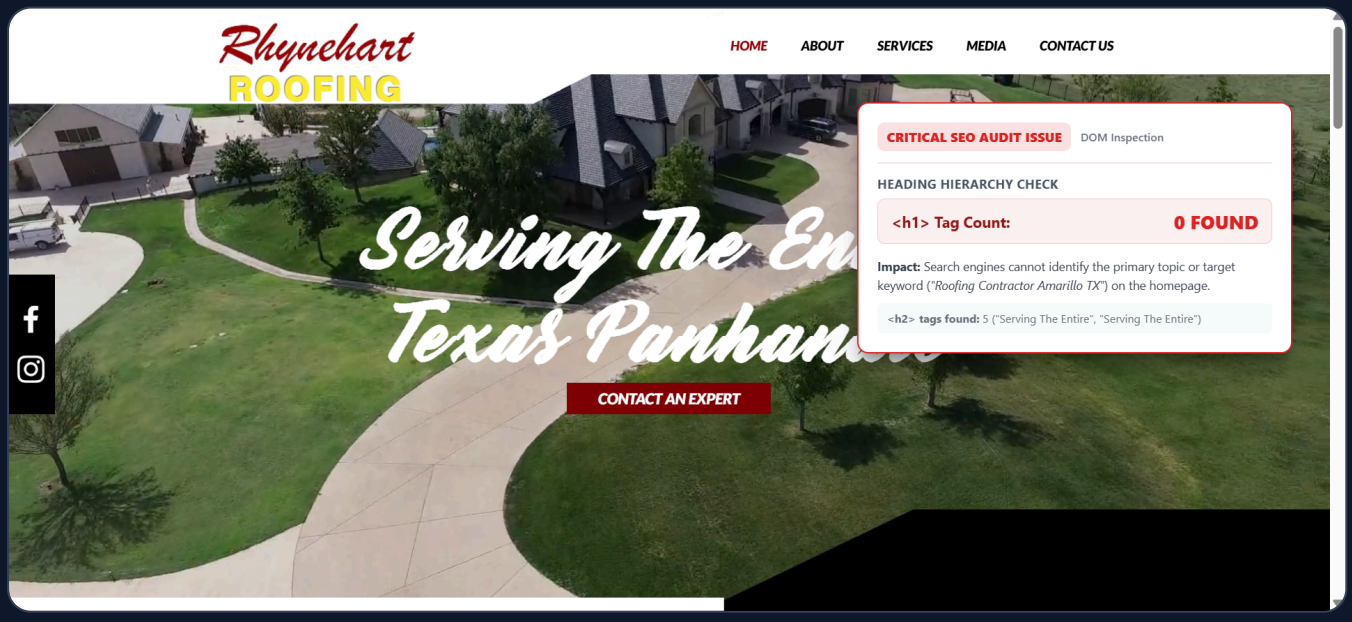

Identified on-page friction points currently reducing Google's topical clarity on rhynehart.com

DEFECT #1 • CRITICAL

Heading Hierarchy

Missing H1 Headings Weakens Hierarchy

Missing <h1> headings weaken the page's topical hierarchy and reduce clarity around its primary service and geographic focus. The homepage has **0 H1 tags**, transitioning directly into 5 unoptimized H2 tags.

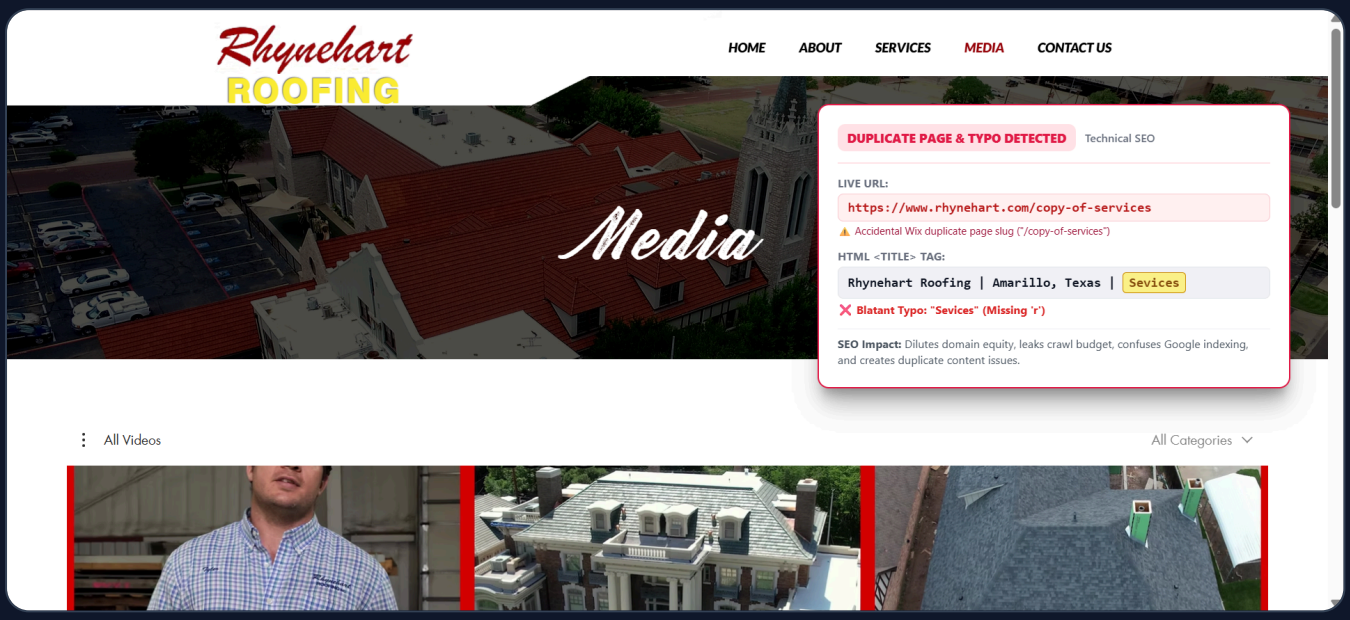

✓ Recommended Fix: Implement single, clear H1: *"Amarillo Roofing Contractor & Storm Damage Restoration"*.

DEFECT #2 • HIGH

URL Hygiene

Indexed Duplicate Page & Title Typo

An accidental duplicate clone URL (`/copy-of-services`) is live and indexed in Google search. Its HTML title tag contains a spelling typo: *"Rhynehart Roofing | Amarillo, Texas | **Sevices**"*, which dilutes topical authority.

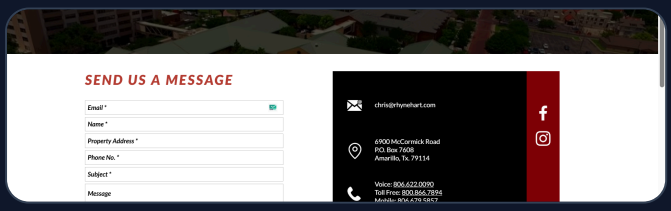

✓ **Recommended Fix:** 301 Permanent Redirect to /services, correct title tag, and remove duplicate from index.

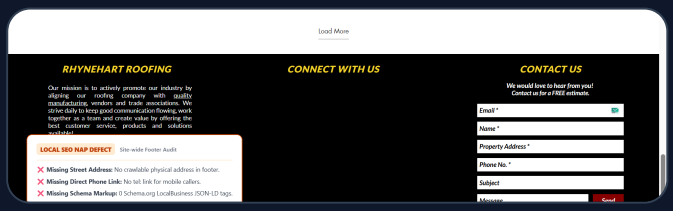

DEFECT #3 • CRITICAL

NAP Alignment

Address Mismatch (79114 vs 79118)

Your Google Business Profile is registered at **79118**. However, the website's `/contact` page displays **79114** with a P.O. Box, and the site-wide footer lacks a crawlable physical address block and click-to-call link.

✓ **Recommended Fix:** Standardize exact corporate NAP in footer, format phone with tel:, and deploy LocalBusiness Schema.

DEFECT #4 • HIGH

Content Depth

Limited Service Content & Mobile Speed

The services page contains only **399 words** (site average 317 words), limiting its ability to rank for specialized commercial and storm queries. Mobile PageSpeed scores **55/100**, with 53 images missing descriptive alt tags.

Services Word Count:	399 words (Sparse)
Mobile PageSpeed:	55 / 100
Images Missing Alt Text:	53 of 70 (75.7%)

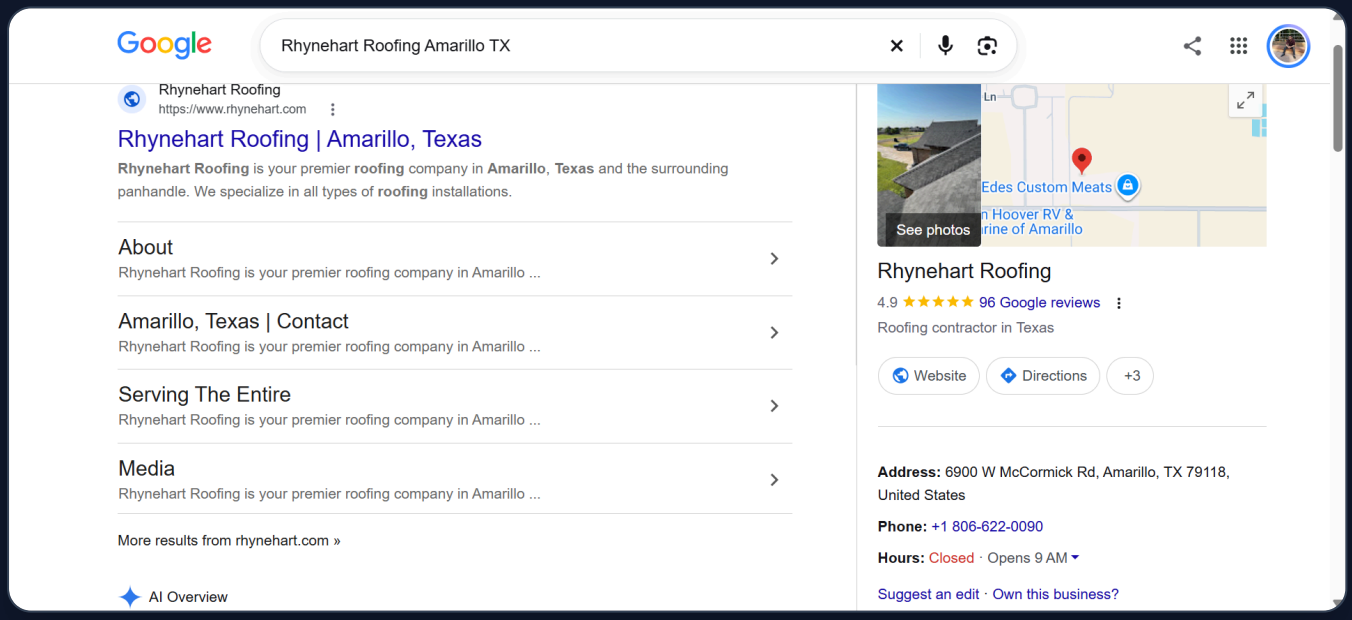

✓ **Recommended Fix:** Expand into 6 dedicated 800+ word landing pages, compress images, and write descriptive alt tags.

03 Google Business Profile & AI Visibility Strategy

Positioning your exceptional reputation to capture modern search and AI recommendations

VERIFIED GBP ASSET

Google Knowledge Panel

Strong Customer Trust Foundation: 4.9★ rating across 96 Google reviews. Customers specifically praise René Montoya and Dale Orr for responsiveness, thoroughness, and transparent guidance through insurance claims without aggressive upselling.

Profile Optimization Opportunities:

- **Visual Portfolio Expansion:** Rhynehart currently has **33 photos**. Leading competitors maintain richer photo galleries (Accent: 104, Ortiz: 120, Morgan & Myers: 68). Adding authentic before-and-afters increases click-through rates.
- **Secondary Category Alignment:** Currently configured only with *Roofing contractor* and *Siding contractor*. Adding relevant secondary categories like *Gutter service* and *Repair service* broadens category relevance.
- **Conversion & Attribution Tracking:** The website link lacks UTM campaign parameters (`?utm_source=google&utm_medium=gbp`), making it difficult to measure exact calls and form inquiries generated by Google Maps.
- **High-Authority Directory Gaps:** Claimed listings on high-authority contractor networks like **Angi (DA 86)** and **BuildZoom (DA 60)** help reinforce overall prominence.

GENERATIVE AI SEARCH VISIBILITY — Current Score: 6 / 100

When homeowners query AI search engines (such as Google AI Overview or ChatGPT) for *"licensed roofing contractor for hail damage inspection in Amarillo"*, AI models cite competitors who have dedicated storm damage content, insurance claims guides, and structured Q&A schemas. Building these topic clusters will unlock this emerging traffic channel.

04 Our 4-Phase Turnkey Execution Roadmap

A structured, systematic delivery schedule to resolve technical issues and expand map reach

MONTH 1 • IMMEDIATE

Phase 1: Foundation & Technical Setup

Core Health Realignment

✓ Heading Tag Realignment
Implement single, optimized `<h1>` on homepage and service pages; organize subheadings into clean H2/H3 structure.

✓ URL Cleanup & 301 Redirect
Set up permanent 301 redirect from `/copy-of-services` to `/services`, fix title typo, and remove duplicate from index.

✓ Standardized NAP & Click-to-Call
Add crawlable corporate NAP in the global footer and contact page; format all phone numbers with mobile click-to-call.

✓ Schema Markup & Image Alt Tags
Deploy complete `RoofingContractor` JSON-LD schema (geo-coordinates, hours, reviews); add descriptive alt text to all 53 images.

MONTH 1-2

Phase 2: Service Hubs & Local Expansion

Geographic Reach

✓ 6 Dedicated Service Pages
Build comprehensive landing pages: *Residential Roof Replacement*, *Emergency Leak Repair*, *Hail Damage Restoration*, *Commercial TPO & Metal*, *Free Drone Inspections*.

✓ Insurance Claim Negotiation Page
Spotlight René Montoya and Dale Orr's established reputation in assisting adjusters on-site and guiding homeowners through insurance paperwork.

✓ Hyperlocal Area Hubs
Build localized area pages covering key growth neighborhoods: **Canyon, Bushland, Wolflin, Puckett, Western Plateau, and Soncy**.

✓ Quote Conversion Elements
Position authentic review callouts and BBB A+ credentials adjacent to quote forms to maximize visitor-to-lead conversion.

MONTH 2-3

Phase 3: GBP & Citation Authority

Map Pack Elevation

✓ Secondary Categories & Service Catalog
Configure secondary categories (*Gutter service*, *Repair service*); build out itemized service cards matching search intent.

✓ Project Photo Portfolio
Upload 50+ authentic, high-quality project photos showcasing completed roofs, local Amarillo job sites, team members, and branded vehicles.

✓ Tier-1 Citation Verification
Claim and verify profiles on **Angi (DA 86)**, **BuildZoom (DA 60)**, and Facebook Business to ensure consistent NAP authority.

✓ GA4 UTM Lead Attribution Tracking
Tag GBP website and booking links with campaign UTMs to provide leadership with transparent weekly call & form lead counts.

ONGOING

Phase 4: GEO & Review Funnel Engine

Future-Proof AI Search

✓ Generative Engine Optimization (GEO)
Implement structured FAQ schemas answering storm damage and insurance questions to help AI models cite Rhynehart as a trusted source.

✓ Review Request System
Implement a post-job review request system encouraging satisfied customers to share detailed, authentic feedback about their roof replacement experience.

05

Projected Targets, Commercial Models & Next Steps

Clear milestones, flexible engagement structures, and straightforward next steps

DAYS 1 - 30 TARGETS

Technical Baseline

- ✓ 0 crawl errors & duplicate page redirected
- ✓ 100% NAP consistency across website
- ✓ LocalBusiness schema & click-to-call live
- ✓ Mobile performance optimization completed

DAYS 30 - 60 TARGETS

Content Expansion

- ✓ 6 new specialized service pages indexed
- ✓ Angi & BuildZoom directory profiles verified
- ✓ Secondary GBP categories & catalog active
- ✓ 50+ new authentic project photos added

DAYS 60 - 90 TARGETS

Map Expansion

- ✓ Expanding map rankings into Central Amarillo
- ✓ Measurable lift in qualified quote calls
- ✓ Emerging mentions in AI search overviews
- ✓ Established baseline for long-term growth

**Disclaimer: These are strategic performance targets based on competitor deficit models, not guaranteed rankings. Actual timeline varies with Google algorithm updates and implementation speed.*

Engagement Models & Investment Framework

Flexible options tailored to your internal resources and speed requirements

TRANSPARENT SCOPE

Option A: Foundation & Technical Sprint

One-Time Project

Complete execution of **Phase 1** (Heading hierarchy, 301 redirect, footer NAP standardization, click-to-call, LocalBusiness schema injection, image alt tags, and mobile speed tuning). Ideal for resolving all technical friction points immediately.

Option B: Full Turnkey Growth Partner

Monthly Retainer

Full execution across **all 4 Phases** (Technical Sprint + 6 Service Landing Pages + Neighborhood Hubs + GBP Optimization + Tier-1 Citation Building + Monthly Geo-Grid Tracking & Reporting). Built to achieve city-wide map pack dominance.

→ Specific scope boundaries, management fees, and timeline milestones will be finalized collaboratively after our initial strategy walkthrough.

Why Partner With Us?

- ✓ **Data-Driven Approach:** We measure actual local search grids and competitive deficit gaps, not vanity metrics.
- ✓ **Contractor Focused:** We specialize in high-ticket trades where storm damage and roof replacements require rapid lead capture.
- ✓ **Transparent Tracking:** Weekly GA4 and UTM attribution reporting so you see every call generated.

What Happens Next? (Simple 3-Step Process)

1. 10-Min Strategy Call: Review live search grid and prioritize quick wins.
2. Finalize Scope: Select preferred engagement model and deliverables.
3. Kick Off Phase 1: Deploy technical and foundation fixes within 7 business days.

NEXT STEP • ZERO PRESSURE

Let's Review the Live Amarillo Grid Map Together

With your nearly 40-year history and 4.9★ reputation, fixing these technical levers will generate an immediate return. Let's do a quick 10-minute screen-share call to walk through the live grid map and align on the Phase 1 quick wins.
